

CzBA

Czech Biogas Association

About us

Czech Biogas Association has become a national technology platform in the field of biogas. **CzBA** associates experts and other parties concerned in production and utilization of biogas including R&D, informs about related technologies, provides important and verified knowledge and approaches and develops relations to public bodies and authorities. **CzBA** is co-founding member of European Biogas Association, member of Czech Gas Association and member of several other related platforms.

Actual strategic goals

- Creation of Strategic Research Agenda
- Initiation of R&D projects
- Participation on new legislative and price regulations
- Educational, conference and enlightenment activities in the field of biogas
- Providing knowledge exchange among members and leading experts
- Participation on new EU legislative and regulations within European Biogas Association activities
- Support and development of biomethane related issues

CzBA is involved in following EU financed projects:

TP Bioplyn

- Creation of national technology platform that links and coordinates R&D together with industry sector with the goal of stabilization, promotion and progress of the whole branch
- Creation of strategic frame for R&D and innovations in the field of biogas production and utilization
- Integration to European level structures, enlightenment

GasHighWay (Intelligent Energy Europe)

- Providing knowledge transfer and technical support to potential and existing biogas producers in order to boost the investment projects
- Promote the realisation of a comprehensive network of filling stations for biomethane and natural gas spanning Europe from the north, Finland and Sweden, to the south, Italy
- Providing knowledge transfer and technical support to organisations interested in the uptake of gas vehicle fleets
- Raising the awareness of the key target groups along with the general public and decision makers on the use of biomethane and CNG as vehicle fuel
