# KEY ENERGY

## THE **RENEWABLE ENERGY** EXPO

**KEY ENERGY** is Europe's comprehensive event on renewables located in Italy. Its sectors are:

- **Renewable energy (PV, Wind Power)**
- **Storage and solutions for distributed power generation**
- **Energy efficiency applied to industry and building**
- **Cogeneration, trigeneration, micro-cogeneration**
- **Sustainable Cities: smart cities and sustainable mobility**

**KEY ENERGY** serves as a comprehensive showcase of technologies and services for the decarbonisation of the economy, now essential in light of the energy transition process launched with the Paris Agreement and made binding by European objectives.

From renewable sources, to storage, the efficient use of energy, right down to digital technologies and future mobility.

**KEY ENERGY** also represents a chance to train and get updated on the latest trends, such as:

- **Renewable energy and emerging markets**
- **New business tools (PPAs; energy communities)**
- **Innovative solutions and technologies**
- **Energy integration models**
- **Regulatory framework, tools and mechanisms supporting the sector**

Gross Area

# WHO ARE THE VISITORS

# WHY YOU SHOULD ATTEND KEY ENERGY

---

To develop new business relationships, not only in the Italian market but also across Europe.

---

To meet professional and qualified visitors.

---

To explore networking opportunities with the sector's key players.

---

To keep informed about technologies, legislative aspects, development trends and new emerging markets.

---

To be part of a community and gain access to the institutions network.

# TRAINING, INFORMATION, SCENARIO

## KEY ENERGY

KEY ENERGY is not only a showcase, but also an opportunity for energy professionals to meet and share their knowledge with the sector's key players, as well as benefit from updates and training.

The conferences and workshops programme is organized by a Scientific Committee that includes all relevant institutions and industrial associations, as well as technical/scientific and civil society organisations.

The 2019 conference programme will focus on technological innovations, financial models and organisational solutions that will help Italy reach the ambitious 2030 European targets.

A major focus will be placed upon the challenges and opportunities that Italian companies will face in the international market, while international investors will get a thorough insight on the Italian market.

**534** speakers.

National and international experts come together with representatives from Italian institutions (Ministry of Economic Development, Ministry for the Environment, GSE, Energy Authorities, ENEA...) and overseas bodies (Morocco, Denmark...)

**2.450**  
attendees

**60+**

events, including  
conferences,  
workshops and  
training courses

# 2019 HIGHLIGHTS

---

## RENEWABLE ENERGY SOURCES

- National and international scenario
- Utility-scale solar plants and PPAs
- Energy communities, prosumers
- Solar and wind revamping
- Storage and digital systems

---

## ENERGY EFFICIENCY

- New perspectives for white certificates
- Thermal account: new scenarios
- Deep renovation in construction

---

## SUSTAINABLE MOBILITY

- Increasingly flexible public transport
- The future of shared mobility
- The future of electric mobility

---

## CITTÀ SOSTENIBILE

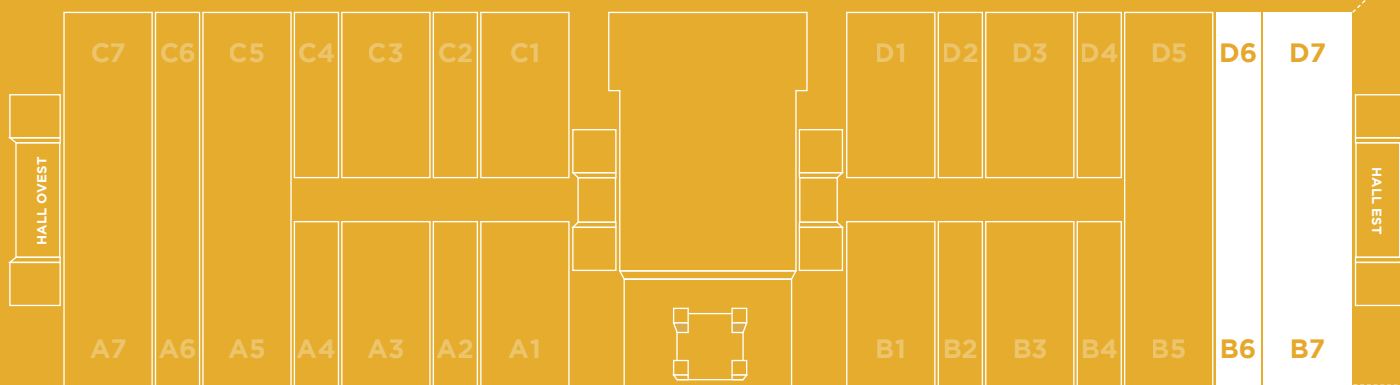

- Circular economy in the management of citizens' services: new technologies and business models

# THE KEY ENERGY SECTORS

Technologies and solutions for the targets set by the 2030 EU targets

Key Energy runs simultaneously with Ecomondo, Italy's reference event regarding new models of circular economy. The exhibitions is an international event with an innovative format that brings together all sectors of circular economy in a single platform: from material and energy recovery to sustainable development.

Ecomondo presents the latest innovations, technologies and opportunities regarding the re-use of the main types of technical and biological waste, innovative raw materials and industrial eco-design, the decontamination and remediation of contaminated areas, including coastal areas, and the circular bioeconomy.

## KEY WIND

Wind turbines for on- and off-shore, components, energy producers, solutions for revamping and re-powering of existing parks. Organized in collaboration with ANEV.

## KEY SOLAR & KEY STORAGE

Photovoltaic, inverters, thermodynamic solar, components, solutions for O&M&P (revamping and re-powering), energy storage technologies, smart grids.

**D6**

**D7**

**B6**

**B7**

## KEY EFFICIENCY

Cogeneration, trigeneration, micro-cogeneration, high-efficiency motors, geothermal energy and heat pumps, systems to digitalise, monitor and manage consumption for the increased energy efficiency of industrial processes, ESCo, EPC contractors, energy renewal in buildings.

## CITTÀ SOSTENIBILE

Technologies and services available to the PA for renewing and increasing the efficiency of buildings and cities, efficient public lighting, utilities, ICT solutions and products for services, buildings, smart grids and sustainable mobility, electric & hybrid cars, car and e- bike-sharing, smart parking.

## SPONSORS AND COLLABORATIONS

European Commission, Italian Ministry for Environment, Land and Sea Protection, Emilia Romagna Region, Rimini Municipality, ENEA, ICE Agency, Italian Foundation for Sustainable Development, UTILITALIA, ANEV (Italian National Wind Energy Association), ANCI (National Association of Italian Municipalities), ANEST (National Association for Thermodynamic Solar Energy), ANFIA (National Association for the Automotive Industry Supply Chain), ANIASA (National Car Rental and Automotive Services Association), ANIE Energia, ANIE Rinnovabili, ASCOMAC - COGENA - UNIMOT, AssoESCo (Italian Association of Energy Service Companies), ASSTRA (Transport Association), ASTER, COBAT, Coordinamento FREE, Elettricità Futura, Euromobility, Federesco, FIRE (Italian Federation for Rational Energy Use), Green Building Council, GSE (Energy Service Manager), Legambiente, ISES Italia (International Solar Energy Society), Itabia (Italian Biomass Association), Italcogen (Association of cogeneration plant manufacturers and distributors), Italia Solare, Kyoto Club, Res4Africa, Res4Med

This information is related to the 2018 edition: some of the partners above have yet to be officially confirmed.
